## PROFILE

Dynamic Frontend Developer with 5 years of experience in crafting innovative mobile applications for both iOS and Android platforms. Proficient in React Native and JavaScript, expertise has been honed through a commitment to enhancing user experiences and implementing effective solutions. A proven track record in collaborating with cross-functional teams ensures seamless communication and high-quality deliverables. Skilled in Agile methodologies, adept at driving projects to completion while maintaining performance excellence. Ready to leverage technical prowess and creativity to contribute to forward-thinking development initiatives.

## EMPLOYMENT HISTORY

### React Native Developer at Softtek, Mexico City

October 2022 — August 2024

In my role as Frontend Developer, I was actively involved in the development and maintenance of mobile applications for iOS and Android. My responsibilities included:

- Troubleshooting bugs and executing key tasks to ensure optimal performance of mobile applications.
- Proposing solutions and improvements for the implementation of applications, contributing to the evolution and continuous improvement of the product.
- Creating documentation required for each implemented task performed.
- Working closely with the team to resolve technical questions and concerns, ensuring effective communication and the delivery of high-quality results.
- I took on the role of backup to the Scrum Master, supporting the facilitation of agile ceremonies and coordinating the team to meet sprint goals.

### IT-Operations Engineer at MCM telecom, Mexico City

August 2019 — July 2022

- Develop the first functional prototype for a new mass instant messaging service using a third-party service, through APIs.
- Implement the first notification test service towards the client, using PHP, Bootstrap, HTML5, MySQL.
- Integrate Resfull APIs for mobile developments.
- Perform changes and maintenance of Firewall equipment to reduce the impact in case of failures.

### Support Engineer at MCM Telecom, Mexico City

January 2018 — July 2019

- I participated in software development proposals to improve the management of the company's equipment using PYTHON and
- MySQL.
- IT operations support, providing maintenance and support for Fortinet firewalls, as well as domain registrations on the company's
- DNS servers

### Developer Frontend (Freelance) at Waisoft, Queretaro

January 2019 — December 2022

- I made changes to mobile apps, as well as layouts of new design proposals.
- I collaborated with design teams to ensure that software solutions improved the customer experience.
- I connected APIs to mobile applications, using Node.JS and React Native.
- I implemented changes to landing pages of websites with errors.

## Desarrollador Fullstack (Practicas) at Compusof, Queretaro

January 2017 — December 2017

- I collaborated in the development of a system that collects the information handled
- in the company, to have better control of the information regarding the established metrics.
- The platform was created with Laravel, PHP, HTML, CSS, JavaScript.

## EDUCATION

### Engineering, Instituto Superior Del Estado de Hidalgo, Hidalgo

August 2013 — December 2018

During my training I acquired a solid foundation in software development, database administration and emerging technologies, which allowed me to specialize in mobile and web development..

## COURSES

### NS1 and NS2 Certifications, Fortinet

January 2020 — December 2020

### React-native, Talently

June 2022 — December 2024

### ReacrJS, Talently

January 2022
